

Creeks & Ponds

INTERVIEW

*Choose an animal that you saw or learned about during the nature van visit.
Imagine you are this animal,
then have the class or a partner see if they can guess which animal you are!*

1. What kind of animal are you? (circle one)
Mammal Bird Reptile Amphibian Insect Other: _____
2. Do you move: Quickly or slowly? Noisy or quiet?
3. What color are you? _____
4. What habitat do you spend most of your time in? _____
5. What is your favorite food? _____
That means you're a (circle one): Herbivore Carnivore Omnivore Scavenger
6. What do you feed your babies? _____
7. Which of your senses helps you find your food? _____
8. While searching for food, are there predators you have to be careful of? _____
9. How do you protect yourself? _____
10. Do you have any way of keeping warm in the winter? _____
11. Do you build any kind of home? _____
12. How do you benefit nature? _____
13. How do you benefit people? _____
14. "Are you a _____?"

Draw your animal:

Draw its footprint:

Creeks & Ponds

Creekquations!

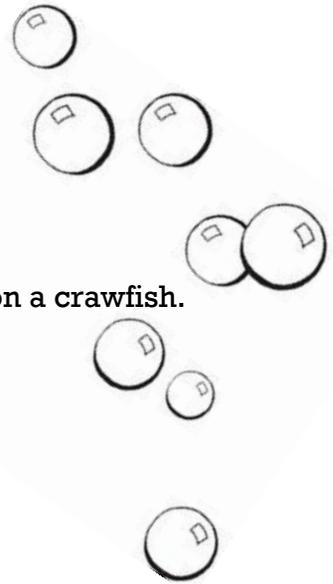

Use your knowledge from the WildCare Nature Van visit to solve the problems below.
You may need to do some of your own nature investigation too!

1. Add the number of wings on a dragonfly to the number of legs on a frog.
Multiply that by the number of feet on a snail.

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} \times \underline{\quad} = \boxed{\quad}$$

2. Add the number of claws on a ruddy duck to the number of pinchers on a crawfish.
Multiply that by the number of toes on a salamander.

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} \times \underline{\quad} = \boxed{\quad}$$

3. Multiply the number of tips on a garter snake's tongue by the number of points on the wings on a bat.
Add that to the number of legs on an aquatic spider.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \boxed{\quad}$$

4. Subtract the number of talons on a Cooper's hawk from the number of gills on a tadpole.
Multiply that by the legs on a muskrat.

$$\underline{\quad} - \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} \times \underline{\quad} = \boxed{\quad}$$
