

Marvelous Mammals

Color the **MAMMALS** to look as real as you can remember them from the WildCare Van visit to your school!

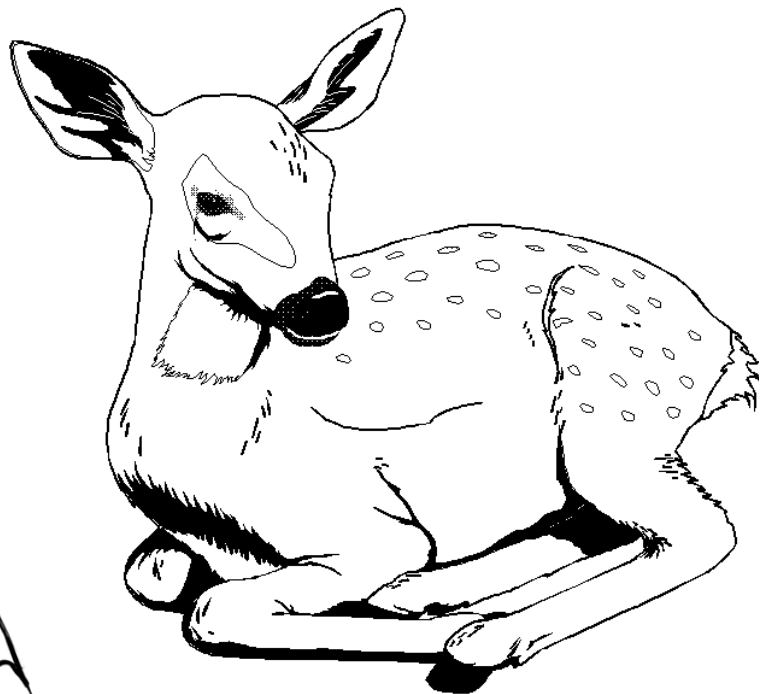

Bobcat has eyes in front of its head for hunting.
It is brown with dark spots on its back.

Broad-Footed Mole lives underground and has huge front claws for digging.
Its black fur is extremely soft!

Little Brown Bat comes out at night and can eat 600 mosquitoes an hour. Color it brown and gray.

Fawns (Black-tailed Deer) can hold very still while mother is out eating.
Color it light brown with white spots.
Its hooves are black.
