

# Marvelous Mammals

**HERBIVORES** are animals that eat only plants.

**CARNIVORES** are animals that eat only animals.

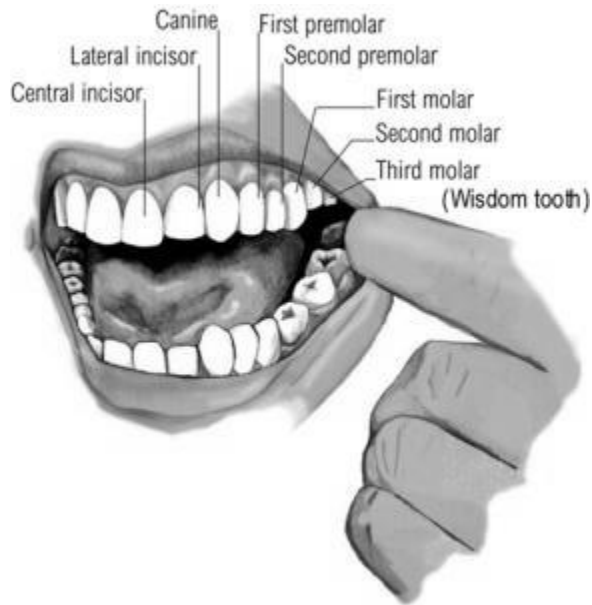

**OMNIVORES** are animals that eat both plants and animals.

*We can usually tell what an animal eats by looking at its teeth!*

*Humans are **Omnivores**, so we have all different shaped teeth in our mouths.*

*Take a look at the diagram and think about all the different shapes of teeth you can see.*

*Explain what you think each type of tooth is for eating!*
