

Ocean Adventures

Across

1. Furry marine mammal with four flippers.
3. Layer of fat under a whale's skin to keep warm.
4. White water bird with tall black legs and yellow feet.
6. Like a whale crossed with a unicorn!
8. Some whales have this instead of teeth.
10. Large sea bird with a stretchy long beak beak.
11. A black and white toothed whale.
12. Tiny shrimp-like animal that whales eat.

Down

1. Star-shaped animal found in tide pools.
2. A small shark with spots like a leopard.
3. Shellfish often found stuck to whales.
5. Long underwater 'trees' close to shore.
7. Large reptile with a hard shell.
8. Sandy strip of land beside the ocean.
9. Tropical reefs are often made of this group of organisms.
