

Raptors

INTERVIEW

Choose a raptor that you saw or learned about during the nature van visit.
Imagine you are this raptor and have someone interview you.
See if the class can guess which raptor you are!

1. What kind of animal are you? (circle one)
Owl Hawk Eagle Turkey Vulture Other: _____
2. Do you move: Quickly or slowly? Noisy or quiet?
3. What color are you? _____
4. What habitat do you spend most of your time in? _____
5. What is your favorite food? _____
That means you're a (circle one): Carnivore Omnivore Scavenger
6. What do you feed your babies? _____
7. Which of your senses helps you find your food? _____
8. While searching for food, are there predators you have to be careful of? _____
9. How do you protect yourself? _____
10. Do you have any way of keeping warm in the winter? _____
11. Do you build any kind of home? _____
12. How do you benefit nature? _____
13. How do you benefit people? _____

"Are you a _____?"

Draw your raptor:

A large, empty rectangular box intended for the student to draw their chosen raptor.

Draw its talons:

A large, empty rectangular box intended for the student to draw the talons of their chosen raptor.

Raptors

Raptor Arithmetic

1. Multiply the number of talons on a barn owl by the wings on a red-tailed hawk. Divide that by the number of parts that make up an osprey's beak.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} \div \underline{\quad} = \boxed{\quad}$$

2. Add the number of talons on a golden eagle to the number of nostrils on a turkey vulture.

Multiply that by the letters in "falcon."

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} \times \underline{\quad} = \boxed{\quad}$$

3. Multiply the number of ear holes on a turkey vulture by the letters in "spotted owl". Subtract from that the number of talons on an American kestrel.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} - \underline{\quad} = \boxed{\quad}$$

4. Divide the letters in "kingfisher" by the number of wings on a cooper's hawk. Add that to the letters in "sharp-shinned hawk."

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \boxed{\quad}$$
