

Redwood Giants

Each of these animals lives in **Redwood Forests** and plays a vital role in this unique ecosystem.

Color the **producers** (makes its own food from the sun's energy) in **green**, the **primary consumers** (eats producers) in **blue**, the **secondary consumers** (eats primary consumers) in **red**, and the **decomposers** (breaks down organic matter) in **black**. Then **draw a line** from each animal to show where it belongs in the forest.
